

**DISTRIBUTION & OPERATIONS SUPERVISOR**  
**Supplemental Questionnaire**  
**Santa Ynez Water River Conservation District,**  
**Improvement District No.1**

Please complete the following questions and submit as part of your application package. Use as many additional sheets as needed to provide detailed answers.

1. Please describe your experience in supervising water system disinfection or treatment processes, including your specific responsibilities and how many people you supervised?
  
2. What is your experience with a Supervisory Control and Data Acquisition (SCADA) program? Which program did you use and how did you use it?
  
3. Describe your experience in implementing a safety program. Please include specifics, such as where and when you implemented a program and your exact responsibilities.
  
4. Please summarize your experience in system operations including both groundwater wells and surface water sources, and managing production, reservoir storage and distribution.
  
5. Please describe your supervisory experience and leadership style including an example of your daily interaction with those under your direction.
  
6. What experience do you have in maintaining maintenance and project records and developing and controlling project budgets?
